

CreativeHUB

CreativeHub is a digital production company, headquartered in NYC and India. We build websites/applications for entrepreneurial companies; leveraging the best of onshore (strategy, accountability, reliability) + offshore (cost-effective development).

CreativeHub is a funded venture itself, run by entrepreneurs and incubated at The Wharton School of Business (partners hail from Wharton and Harvard). We've worked with numerous startups, VCs, and established businesses. 80% of our clients have gone on to raise funding and/or successfully exit.
